

JOHANNES GUTENBERG-UNIVERSITÄT MAINZ - 55099 Mainz

PostDoc-Position vacancy

As part for the Carl Zeiss-founded project “[MAINCE](#): Medical AI combining Natural products and CELLular imaging”, we are looking for a motivated and skilled PostDoc. The PostDoc will be involved in experimentally driven elucidation of the mechanism of-action of drug candidates.

Your tasks

- Biophysical experiments (ITC, surface plasmon resonance, x-ray crystallography and more)
- Protein expression and purification
- Determination of structure-activity relationships
- Lab and project management

Your profile

- PhD and a successfully completed university degree in chemistry, pharmacy, biology or related fields
- Sound background in molecular biology

Please send your complete application (Motivation letter, CV, references) as one pdf file (stating “[Application]” in the eMail subject) or any questions to: czodpaul@uni-mainz.de
